

ENTERPRISE E-SIGNATURE INFRASTRUCTURE

Legally enforceable signing that fits your architecture.

SignDex enables regulated organizations to embed secure signing into their own applications while maintaining control over workflow, identity checks, audit evidence, and document storage.

PADES B-LTA

Long-term verifiable PDF signatures.

Multi-CA

Connect to internal or trusted external CAs.

Headless API

Embed signing directly in-app.

BYO S3/Object Storage

Keep business sensitive documents in customer-controlled storage.

Audit Evidence

Capture signer, document, and timestamp records.

Flexible Deployment

Deploy within approved infrastructure.

Why enterprises consider SignDex

Certificate-Based Signing

Create tamper-evident PDFs with certificates, timestamps, and validation evidence.

In-App Execution

Trigger requests and retrieve sealed PDFs via API without redirecting users to third-party portals.

Sovereignty by Design

Use regional hosting and customer-controlled storage to support data privacy and residency requirements.

Built for enterprise leadership

Technology Leaders

API-first integration, webhooks, and flexible deployment models.

Compliance Teams

Non-repudiation and audit evidence for regulated workflows.

Security Teams

Controlled document storage and traceable execution records.

Digital Product Teams

Native signing experiences embedded across digital journeys.

From signing workflow to trusted infrastructure

Standardize execution without outsourcing trust, storage, or your user experience.

Executive Decision Criteria

Verifiable Digital Trust

Independently verifiable PDF signatures backed by certificates, timestamps, and validation evidence.

Data Sovereignty Posture

Regional hosting and customer-controlled storage options that supports data privacy and residency requirements.

Integration Readiness

REST APIs and webhooks for integration into existing business systems.

Audit & Oversight

Traceable records of document, workflow, signer, and timestamp events.

Enterprise Use Cases

Contracts & Procurement

Multi-party approvals and signatures with traceable evidence.

HR & Onboarding

Offer letters, employee forms, and policy acknowledgements.

Financial Services

Controlled signing with signer authentication and tamper-evident records.

Public Sector

Citizen and internal approval workflows with regional storage controls.

Healthcare

Consent and administrative workflows with controlled document access.

Partner Ecosystems

Embed B2B signing into partner portals and business applications.

Need more than convenience?

For teams where legal weight, controlled storage boundaries, and data locality are non-negotiable.
